ISLAM SABIRZYANOV

IT Project Manager | Product Manager

Male, 27 years old | Kazan, Russia | +7 (927) 247-85-30 | islamsabirzyanov@gmail.com

PROFESSIONAL SUMMARY

Results-driven IT Project Manager with 5+ years of experience managing full-cycle development of complex technology products (Web/Mobile). Proven expertise in coordinating cross-functional teams up to 9 members, integrating payment systems and APIs, and implementing AI-driven solutions. Successfully managed projects with budgets exceeding $50,000. Strong background in Agile/Scrum methodologies, release management, technical analysis, and product optimization. Demonstrated experience with secure data handling, API security, and compliance requirements across financial and healthcare sectors.

CORE COMPETENCIES

- Project Management: Agile/Scrum, Kanban, Waterfall | Sprint Planning, Backlog Management, Stakeholder Communication
- Technical Stack: REST API, PostgreSQL, Django/FastAPI, React/Flutter, Docker, CI/CD, API Security
- AI/ML Integration: GPT-4 API, LangGraph Multi-Agent Architecture, Computer Vision for Recognition
- Payment Systems & Security: SBP, CloudPayments, Tinkoff, Apple IAP, Google Play Billing, Robokassa, PCI DSS Compliance
- Data Security: Secure API Design, Authentication/Authorization, Data Encryption, Compliance Management (GDPR)
- Tools & Platforms: Jira, Confluence, Git, Swagger, Postman, Figma, Google Analytics
- Leadership: Team Coordination, Stakeholder Management, Prioritization, Conflict Resolution, Risk Management

PROFESSIONAL EXPERIENCE

IT Project Manager

mediann.dev | April 2025 - Present (9 months)

Project: Yastvo - AI-Powered Nutrition Tracking Application

Role: IT Project Manager / Release Manager | **Team:** 6 members | **Budget:** $50,000+

Technologies: Flutter, Python, FastAPI, PostgreSQL, LangGraph, GPT-4 API, Docker, CI/CD

Key Achievements:

- Led full-cycle development of cross-platform mobile application (iOS/Android) from concept to release in 6 months with $50,000+ budget, ensuring secure user data handling and GDPR compliance
- Architected multi-agent AI system using LangGraph with GPT-4 API integration for real-time food recognition, implementing data validation protocols and secure API communication
- Implemented freemium monetization with 6 subscription tiers and integrated 5 payment systems across regions (Apple IAP, Google Play, RuStore, Robokassa), ensuring PCI DSS compliance

- Orchestrated simultaneous release across 3 app stores (App Store, Google Play, RuStore): prepared marketing materials, ensured platform compliance and security requirements
- Coordinated cross-functional team of 6: organized Agile processes (sprints, planning, retrospectives), resolved critical blockers including camera API compatibility and App Store moderation

Project: "911" - Automotive Services Marketplace Platform

Role: IT Project Manager | **Team:** 5 developers

Technologies: Django/DRF, React, React Native/Flutter, PostgreSQL, FCM, CloudPayments, Tinkoff, OSRM

Key Achievements:

- Launched product from zero to production: ecosystem of 3 platforms (web admin + 2 mobile apps iOS/Android), 60+ screens, 30+ database tables with normalized structure and security measures
- Managed roadmap of 120+ tasks with MoSCoW prioritization, decomposed technical specification into actionable stories
- Designed secure database architecture and created API documentation (Swagger, 60+ endpoints). Implemented dynamic pricing, geolocation-based order distribution with push notifications (FCM), dual-balance financial system with CloudPayments/Tinkoff integration and secure payment processing
- Platform processed 4,000+ orders since launch with 0 critical production incidents, demonstrating robust security and reliability

Project: SMMRockets - SaaS Platform for SMM Promotion

Role: IT Project Manager / Product Manager | **Team:** 5 members

Technologies: Next.js, React, TypeScript, Tailwind CSS, Python, PostgreSQL, Telegram Bot API

Key Achievements:

- Launched MVP in 3 months: managed backlog of 80+ Jira stories, achieved 100% on-time task completion
- Delivered 60+ pages with bilingual content (RU/EN), configured 4 core modules (orders, dashboard, payments, Telegram notifications)
- Implemented SEO strategy: meta tags for all pages, link building.
- Integrated 5+ payment methods for automated promotion across 12+ social networks (Instagram, VK, YouTube, Telegram, TikTok)

Project: Beautiful Hair Institute - Medical Clinic Corporate Website

Role: IT Project Manager | **Team:** 3 specialists + designer

Technologies: FastAPI, React, PostgreSQL, Telegram Bot API, S3

Key Achievements:

- Launched fully functional website with CMS from scratch in 2 months: 20+ screens, 8 functional modules, ensuring HIPAA-compliant patient data protection
- Organized development process: requirements decomposition, daily stand-ups, cross-functional team coordination
- Implemented automated request processing via Telegram Bot with secure data transmission, ensured 100% SEO compliance (sitemap, meta tags, SEO-friendly URLs)

Project Manager

Infomatica LLC | November 2023 - March 2025 (1 year 5 months)

Full-Cycle Project Management:

- Coordinated cross-functional teams up to 9 members (Backend, Frontend, QA, Designers) across multiple payment integration projects
- Applied Agile/Scrum: sprint planning, Daily Standups, retrospectives, backlog management in Jira with focus on security requirements
- Created technical documentation (specifications, flowcharts, API specs), customer approval ensuring compliance with payment security standards

Key Projects:

- **Integrated Installment Service 'Podeli' and Faster Payments System (SBP) at Europe's largest theme park 'Dream Island':** Team of 9. Developed secure integration algorithm, modified database with encryption, implemented payment status processing with fraud prevention. Result: increased transactions, new secure payment methods
- **SBP on Turnstiles:** Team of 5. Integrated Russian Standard Bank API with security protocols, enhanced turnstile software (QR generation, status processing). Result: expanded payment capabilities
- **Boat Rental Terminal (UAE):** Team of 5. Integrated Vendotek terminal with secure payment processing, designed interfaces. Result: enhanced service quality
- **Prepaid Certificates:** Team of 8. Database structural changes with data validation, sales mechanism on website (PHP, Vue.js). Result: new payment method, increased loyalty
- **SBP on Lokomotiv HC Website:** Team of 4. SBER API integration with PCI DSS compliance, UX/UI development. Result: increased ticket purchase conversion

Project Manager

PromBudushchee LLC | June 2022 - October 2023 (1 year 5 months)

- **GIS for Republic of Tatarstan:** Team of 5. Managed project for collecting and visualizing data on roads, fields, forests. Technologies: JS, SQL, NextGIS. Result: efficient land resource management, reduced data processing time
- **SIAP Bank Acquiring Integration with Vendista:** Bank negotiations, document workflow development, payment protocol integration with security compliance
- **30,000 Terminals Communication Support:** Negotiations with operators (Megafon, Beeline, Tele2), tariff optimization, technical coordination. Result: restored connectivity, reduced costs
- **TuganPay Mobile App (ApplePay Alternative):** Team of 4. Mobile application for terminals (Flutter). Terminal enhancement, Paymaster API integration, UX/UI, AppStore release
- **Kaspi Bank QR Integration (Kazakhstan):** Team of 3. Terminal optimization, QR code generation, certification. Result: new payment method in Kazakhstan

IT Project Manager

ISA TECHNOLOGY LTD | May 2021 - May 2022 (1 year 1 month)

- Managed cryptocurrency product development and support, coordinated frontend team with focus on blockchain security
- Cryptocurrency Token Creation: collaborated with blockchain developers, ecosystem integration with security protocols
- International Exchange Listing: negotiations, documentation preparation, technical process coordination with compliance requirements

Deputy Project Manager

Alabuga Special Economic Zone JSC | June 2020 - May 2021 (1 year)

- Led IT projects from planning to working documentation development
- Market and competitor analysis, budget estimation, contractor selection

- Technical specification writing, documentation control

EDUCATION

Kazan Federal University

Institute of Computational Mathematics and Information Technologies

Applied Mathematics and Computer Science | 2016-2026 (in progress)

LANGUAGES

- Russian - Native
- English - B2 (Upper-Intermediate)

ADDITIONAL INFORMATION

- Personal Project: Developed VPN service using Python and SQL with secure data transmission: https://t.me/braidvpn_bot
- Driver's License: Category B
- Relocation: Open to relocation and business trips
- Interests: Martial arts, snowboarding, wakeboarding, maintaining active lifestyle
